

Utility Compliance Inspector II

NATURE OF WORK IN THIS CLASS:

The Utility Compliance Inspector II performs various types of inspection work under the general direction of the Assistant General Manager (AGM) for Compliance and Safety and the direct supervision of a respective program's Manager and when so designated the Utility Compliance Inspector Leader to help manage GWA's wide range of compliance and regulatory activities.

The position performs a variety of skilled and moderately technical inspection work. Employees in this class perform work independently on an ongoing basis and participate in the full range of complex work projects under closer supervision.

ILLUSTRATIVE EXAMPLES OF WORK: (These examples do not list all the duties which may be assigned; any one position may not include all the duties listed)

Performs a variety of skilled work to successfully improve the safety, efficiency and the reliability of the water and wastewater facilities and operations.

The position also includes the capacity to ensure compliance with all applicable established laws, policies, regulations and principles of the programs in the respective section of the Compliance and Safety Division.

Performs the sampling, inspection, monitoring and investigation of residential, industrial and commercial facilities to ensure compliance with Federal and Guam regulations and permit conditions regarding pretreatment and pollution prevention requirements.

Performs the inspection of utility's construction projects to enforce ordinances governing minimum standards and requirements of new construction, alterations, and repairs and enforce compliance with all established laws, policies, regulations and principles of the program.

Provides written documentation on observations, findings, assessments and analyses of site inspection. Identifies and categorizes all known or suspected sources of toxic pollutants or pesticides or materials that may inhibit the operation of or damage the GWA water and wastewater systems.

Generates, establishes, and maintains a variety of records, reports, daily logs of inspections and findings and related documents.

Responds, communicates, interacts and coordinates both with residents and businesses on environmental complaints on illegal and/or hazardous activities. Examines and investigates procedures used, makes reports on the findings, discusses probable cause and recommends corrective actions and problem resolution/system improvements.

Assists the inspection on various systems and products to make sure everything has been built according to Guam or federal codes and regulations. Assists the initial, follow up and periodic inspections of water and wastewater systems projects and related installations to ensure continued compliance with all established laws, policies, regulations and principles of the program.

Participates in inspections to protect the public water supply and wastewater from contamination or pollution of contaminants and/or pollutants through water and/or wastewater interconnections.

Assists in the regular surveys of industrial, agricultural and commercial facilities to determine that adequate maintenance of devices are properly maintained and certified and determines the degree of hazard that may exist to the potable water and wastewater systems. Recommends/enforces procedures for compliance with Guam and Federal legal requirements.

Assists in follow up of recommendations or requirements for corrective actions prepared by the Office of Compliance and Safety.

Assists in the Public Outreach Training and Public Service Announcements related to Utility Protection Program Issues and performance goals.

Composes correspondence, prepares forms and writes reports relating to the Program.

Assists in developing solutions for operational or technical problems associated with the environmental compliance of utility facilities.

Performs other related duties as assigned.

MINIMUM KNOWLEDGE, ABILITIES AND SKILLS:

Working knowledge of the Safe Drinking Water Act (SDWA), Guam Primary Drinking Water Regulations (GPDWR), Clean Water Act (CWA), Clean Air Act (CAA) and GWA's specific Utility Protection Programs, and the best management practices of these programs.

Ability to become familiar with the Hawaii Water System Standards, the Ten States Standards and the Occupational Health and Safety Act (OSHA) and the best management practices of these standards.

Knowledge of the inspection of utilities construction projects to enforce ordinances governing minimum standards and requirements in conformance with established laws, policies, regulations and principles of the program.

Knowledge of environmental inspections, sampling and collection methods.

Ability to apply principles of logical thinking to define problems, collect data, establish facts, and draw valid conclusions to interpret an extensive variety of technical instruction.

Knowledge of operations, procedures, installations, construction and inspection techniques, procedures, regulations, methods, maintenance and repair related to water and wastewater systems.

Ability to interact with contractors and construction personnel to ensure work activities and products meet required quality levels and standards and comply with all established laws, policies, regulations and principles of the program.

Knowledge of occupational hazards, safety precautions and standard safety practices, in order to ensure compliance with applicable Guam and Federal laws, rules and regulations governing water and wastewater systems.
