§3.4 Company shall pay the co-payments, deductibles, and co-insurance required by Medicare and treat Covered Person as having met the Out-of-Pocket maximum under the plan for purposes of receiving benefits under this Agreement.

ARTICLE 4

§4.2 Premium Payment. GovGuam shall pay the Premium due under this Agreement to Company within fifteen (15) business days after the close of each GovGuam pay period. Each such Premium payment shall be for the preceding pay period. Payment in full of all Premiums due constitutes a discharge of GovGuam’s responsibility for the cost of benefits and administration provided under this Agreement. Should GovGuam fail to pay any Premium when due under this Agreement, Company shall have the right to suspend performance under this Agreement with respect to any Covered Person whose Premium payments have not been paid by GovGuam, in addition to the right of termination under Article 5.2.1 and Article 5.3. However, such suspension may only take place after Company provides written notice to GovGuam at least ten (10) days prior to the suspension stating the names of the Covered Persons at risk of suspension and the amount of Premium owed for each. Further, Company shall retroactively reinstate a Covered Person’s right to benefits upon full payment of the past due Premiums only if the premiums are paid within 120 days after the notification of the suspension.

§4.3 Experience Participation. No later than January 31, 2019, the Company shall present to GovGuam an annual experience participation accounting, which will produce either a positive or negative balance after accounting for all incurred claims and the 14% of premium guaranteed retention for the Company, such experience participation to be determined as follows,

4.3.1 The term “Target Experience” shall mean the amount calculated by multiplying (a) the total Premiums earned by the Company for the full 12-month Plan Year ending September 30, 2018 under the HSA $2,000 deductible policy and the PPO $1,500 deductible policy issued to GovGuam with respect to such Plan Year (such two separate policies being referred to, collectively, as the “Participating Policies”), by (b) eighty-six percent (86%).

4.3.2 The “Actual Experience” shall be an amount calculated by subtracting from the Target Experience all claims incurred during such Plan Year under both the Participating Policies (i.e., Actual Experience = Target Experience (Total Premiums x 86%) minus incurred claims, the PPACA Insurance Company Fee or Tax and the PCORI fee).

4.3.3 To the extent the Actual Experience is positive (i.e., an amount greater than zero), such amount will be called an “Experience Refund,” and the Company shall remit such amount to GovGuam for placement into the “Section 2718 Fund” established by Title 4, Guam Code Annotated, Section 4302.3 (P.L. 31-233: XII:18).

4.3.4 To the extent the Actual Experience is negative (i.e., an amount less than zero), the Company may add this amount to the premium needed for the Plan Year beginning on October 1, 2019, but only if the Company is the health insurance provider during such Plan Year.

4.3.5 This Experience Participation provision determines the combined Actual Experience of both the Participating Policies. Identical provisions, describing the combined calculation, are included in each of the Participating Policies for convenience, but the result of the combined calculation shall be applied only once. If necessary to determine the distribution of any positive or negative amount of Actual Experience between the two Participating Policies, such amount may be allocated between the two policies in any share, at the discretion of GovGuam, as long as the total of the shares is equal to the combined amount of the Actual Experience.

4.3.6 If PPACA’s Minimum Loss Ratio (“MLR”) requirements result in a refund, from the Company to GovGuam, of a refund for either the 2017 or 2018 calendar year MLR calculations, any Experience Refund calculated above in section 4.3.3, will be reduced by the portion of the MLR refund payable to GovGuam and
applicable to the Participating Policies. The portion applicable to the Participating Policies is determined by multiplying the MLR refund by the ratio of the Participating Policies' earned premium in the calendar year to the total of the GovGuam earned premium in that calendar year. A hypothetical illustration is included in this agreement as Exhibit D.

ARTICLE 5

§5.2 Termination.

5.2.1 By Company. §5.3 Individual termination.

5.3.1 Non-payment of Premium. DISEASE MANAGEMENT

NetCare covers a variety of programs and activities focused on Disease and Case Management. NetCare’s Medical Management Department is staffed with medically trained professionals who are responsible for coordinating programs and member referrals to various contracted wellness providers both on-island and off-island.

The following is the current Disease and Case Management criteria:
• Plan covers 80% of charges and the member pays the remaining 20% of charges. This applies to clinic visits, laboratory procedures and medications.
• Deductible does not apply to the Disease and Case Management programs.
• After the member has successfully completed the program, NetCare will reimburse the member for the 20% co-payment once a reimbursement from the member is filed and processed.
• NetCare provides 100% coverage for wellness services provided through, RGA’s Rosebud Program for complicated pregnancies; and activities through American Health Holdings.

Other Disease Management Programs include the following programs:

Asthma Care Management – members diagnosed with asthma will likely trigger or open a case management program which includes providing a member with a nebulizer to be used for home treatment. In addition, NetCare works closely with Optum Rx, our pharmacy benefit manager to identify and monitor members who have been prescribed with beta agonist (inhaled). NetCare’s Case Management Specialists will routinely review on a weekly and monthly basis all medication refills for compliance and non-compliance. Members who have been determined to be non-compliant with their medications are telephoned to remind them to fill out their prescription medications and/or to determine why they have not filled their prescriptions and determine if proper intervention can be implemented with the member's primary care physician.

Cancer Care Management – NetCare has implemented case management programs with American Health Holdings (AHH) for those members who have opted to receive cancer treatment in the U.S. Mainland. AHH assigns a specific case manager who is a registered nurse with specialty in oncology services and treatment. AHH works closely with NetCare’s Medical Management Department to provide updates and address any issues that the member may be encountering. For members receiving cancer treatment and services on island, NetCare’s Medical Management Department closely monitors all cases to ensure proper intervention that may be needed on continuing treatment. NetCare works to ensure that there are little to no delays in a member’s treatment. All pre-certification requests including medications and appointments are facilitated in an expeditious manner. NetCare also works closely with the member in recommending and/or approving any necessary referrals to off-island facilities.

Congestive Heart Failure Care Management – A hospital admission to the hospital automatically triggers case management review. During an inpatient stay, NetCare’s Case Management Specialist will provide necessary counseling and resources available for the member and the family in order for them to fully understand the disease process and encourage health risk modification behavior. In addition, NetCare will facilitate the necessary referrals to specialists both on-island and off-island.

Diabetes Care Management- NetCare’s In-Control Diabetes Care Management Program is designed to provide members with knowledge and resources about the importance of keeping their blood sugar levels under control. NetCare provides a free Accu-Chek Advantage Meter and Diabetic Care Kit for eligible members. This program includes the monitoring meter, test strips, lancets etc...required for blood glucose monitoring. NetCare currently contracts with Health Services of the Pacific, SDA Wellness Center, and Horinuchi Wellness Clinic to provide on-going referrals for wellness treatment and services for diabetic members.

The goal of the program is to manage any possible complicated issues and needs.

Pre-Natal Care Management- NetCare utilizes and contracts with the ROSEBUD Program to handle and manage pre-natal and prenatal case management issues. The ROSEBUD Program which is facilitated and coordinated by a registered nurse
provides educational resources to promote healthy lifestyles in low risk pregnancies. This is accomplished through a comprehensive risk screening assessment. For prenatal cases, the goal is to bring high risk pregnancies closer to term and decrease neonatal intensive care unit days.

**Is your family growing?** To protect your new baby and yourself against whooping cough, get a Tdap vaccine. The recommended time is the 27th through 16th week of pregnancy. Talk to your doctor for more details.

**NOTE:**
If your child misses a shot, you don't need to start over, just go back to your child's doctor for the next shot. Talk with your child's doctor if you have questions about vaccines.

**FOOTNOTES:**
- Two doses given at least four weeks apart are recommended for children aged 6 months through 8 years of age who are getting an influenza (flu) vaccine for the first time and for some other children in this age group.
- Two doses of HepA vaccine are needed for lasting protection. The first dose of HepA vaccine should be given between 12 months and 23 months of age. The second dose should be given 6 to 18 months later. HepA vaccination may be given to any child 12 months and older to protect against HepA. Children and adolescents who did not receive the HepA vaccine and are at high-risk, should be vaccinated against HepA.
- If your child has any medical conditions that put him at risk for infection or is traveling outside the United States, talk to your child's doctor about additional vaccines that he may need.

Vaccine-Preventable Diseases and the Vaccines that Prevent Them

Diphtheria (Can be prevented by DTaP vaccination)

Diphtheria is a very contagious bacterial disease that affects the respiratory system, including the lungs. Diphtheria bacteria can be passed from person to person by direct contact with droplets from an infected person's cough or sneeze. When people are infected, the bacteria can produce a toxin (poison) in the body that can cause a thick coating in the back of the nose or throat that makes it hard to breathe or swallow. Effects from this toxin can also lead to swelling of the heart muscle and, in some cases, heart failure. In serious cases, the illness can cause coma, paralysis, and even death.

Hepatitis A (Can be prevented by HepA vaccination)

Hepatitis A is an infection in the liver caused by hepatitis A virus. The virus is spread primarily person-to-person through the fecal-oral route. In other words, the virus is taken in by mouth from contact with objects, food, or drinks contaminated by the feces (stool) of an infected person. Symptoms can include fever, tiredness, poor appetite, vomiting, stomach pain, and sometimes jaundice (when skin and eyes turn yellow). An infected person may have no symptoms, may have mild illness for a week or two, may have severe illness for several months, or may rarely develop liver failure and die from the infection. In the U.S., about 100 people a year die from hepatitis A.

Hepatitis B (Can be prevented by HepB vaccination)

Hepatitis B causes a flu-like illness with loss of appetite, nausea, vomiting, stomach pain, and jaundice. Symptoms of acute hepatitis B include fever, fatigue, loss of appetite, nausea, vomiting, and jaundice. Symptoms of chronic hepatitis B include fatigue, joint pain, and jaundice. Symptoms of acute hepatitis B include fever, fatigue, loss of appetite, nausea, vomiting, and jaundice. Symptoms of chronic hepatitis B include fatigue, joint pain, and jaundice. Symptoms of hepatitis B can include fever, fatigue, joint pain, and jaundice.

Human Papillomavirus (Can be prevented by HPV vaccination)

Human papillomavirus is a common virus. HPV is most common in people in their teens and early 20s. It is the major cause of cervical cancer in women and genital warts in women and men. The strains of HPV that cause cervical cancer and genital warts are spread during sex.

Influenza (Can be prevented by annual flu vaccine)

Influenza is a highly contagious viral infection of the nose, throat, and lungs. The virus spreads easily through droplets when an infected person coughs or sneezes and can cause mild to severe illness. Typical symptoms include a sudden high fever, chills, a dry cough, headache, runny nose, sore throat, and muscle aches. In the beginning, symptoms of pertussis are similar to the cold common, including runny nose, sneezing, and cough. After 1-2 weeks, pertussis can cause spells of violent coughing and choking, making it hard to breathe, drink, or eat. This cough can last for weeks. Pertussis is most serious for babies, who can get pneumonia, have seizures, become brain damaged, or even die. About half of children under 1 year of age who get pertussis must be hospitalized.

Pneumococcal Disease (Can be prevented by pneumococcal vaccine)

Pneumonia is an infection of the lungs that can be caused by the bacteria called pneumococci. This bacteria can cause other types of infections too, such as ear infections, sinus infections, meningitis (infection of the covering around the brain and spinal cord), and bacteremia (bloodstream infection). Sinus and ear infections are usually mild and are much more common than the more serious forms of pneumococcal disease. However, in some cases pneumococcal disease can be fatal or result in long-term problems, like brain damage and hearing loss. Pneumococcal disease spreads when people cough or sneeze. Many people have the bacteria in their nose or throat at one time or another without being ill—this is known as being a carrier.

Polio (Can be prevented by IPV vaccination)

Polio is caused by a virus that lives in an infected person's throat and intestines. It spreads through contact with the stool of an infected person and through droplets from a sneeze or cough. Symptoms typically include sore throat, fever, tiredness, nausea, headache, or stomach pain. At least 3% of cases, polio can cause paralysis. Among those who are paralyzed, about 2 to 10 children out of 100 die because the virus affects the muscles that help them breathe.

Rubella (German Measles) (Can be prevented by MMR vaccination)

Rubella is caused by a virus that is spread through coughing and sneezing. In children, rubella usually causes a mild illness with fever, swollen glands, and a rash that lasts about 3 days. Rubella rarely causes serious illness or complications in children but can be very serious to a baby in the womb. If a pregnant woman is infected, the result to the baby can be devastating, including miscarriage, severe heart defects, mental retardation, and loss of hearing and eye sight.

Tetanus (lockjaw) (Can be prevented by tetanus vaccination)

Tetanus is caused by bacteria found in soil, dust, and manure. The bacteria enter the body through a puncture, cut, or sore on the skin. When people are infected, the bacteria produce a toxin (poison) that causes muscles to become tight, which is very painful. Tetanus mainly affects the neck and belly. This can lead to "locking" of the jaw so a person cannot open his or her mouth, swallow, or breathe. Complete recovery from tetanus can take months. One to two out of 10 people who get tetanus die from the disease.

Varicella (Chickenpox) (Can be prevented by varicella vaccination)

Chickenpox is caused by the varicella zoster virus. Chickenpox is very contagious and spreads very easily from infected people. The virus can spread from either a cough, sneeze, or it can spread from the blisters on the skin, either by touching them or by breathing in small airborne particles. Typical symptoms of chickenpox include an itchy rash with blisters, tiredness, headache and fever. Chickenpox is usually mild, but it can lead to severe skin infections, pneumonia, encephalitis (brain swelling), or even death.
## Recommendations for Preventive Pediatric Health Care

Bright Futures®/American Academy of Pediatrics

These recommendations represent a consensus by the American Academy of Pediatrics (AAP) and Bright Futures. The AAP continues to emphasize the importance of continuity of care in comprehensive health supervision and the need to avoid fragmentation of care.

EXHIBIT F

CLAIMS AND APPEALS PROCEDURES

The Affordable Care Act ensures a member’s right to an internal appeal or asks NetCare to reconsider its decision to deny payment for a service or treatment. The law also permits the member to have an independent review organization (an external review) decide whether to uphold or overturn NetCare’s internal appeal decision. NetCare uses guidelines from the Uniform Health Carrier External Review Act to assure a member has the opportunity for an independent review of an adverse determination or final adverse determination.

If a claim is denied, in whole or in part, NetCare will furnish notice to the member specifying reason or describe any additional information required in perfecting the claim and the member’s right to file an internal appeal. If the member wishes to review and discuss the reason for the denial, a request must be made in writing to NetCare within one-hundred eighty (180) days of receipt of a denial notice. NetCare will re-evaluate the claim in question and give a final written decision on the re-evaluation within sixty (60) days for services already incurred, thirty (30) days for non-urgent care not yet received, or seventy-two (72) hours for urgent care, after such request is received.

NOTICE OF APPEAL RIGHTS

A member has the right to appeal any decision we make that denies payment on a claim or a request for coverage of a health care service or treatment.

A member may request more explanation when a claim or request for coverage of a health care service or treatment is denied or the health care service or treatment a member received was not fully covered. A member can contact our office at 671-472-3610 when the following is applicable or occurs:

- Do not understand the reason for the denial;
- Do not understand why the health care service or treatment was not fully covered;
- Do not understand why a request for coverage of a health care service or treatment was denied;
- Cannot find the applicable provision in your Policy Specification;
- Want a copy (free of charge) of the guideline, criteria or clinical rationale that we used to make our decision; or
- Disagree with the denial or the amount not covered and you want to appeal.

If a claim was denied due to missing or incomplete information, a member or his/her health care provider may resubmit the claim to us with the necessary information to complete the claim.

Appeals

All appeals for claim denials (or any decision that does not cover expenses a member believes should have been covered) must be sent in writing to our office at 424 W. O’Brien Drive, Suite 200, Hagatna, Guam 96910 within 180 days of the date you receive our denial. We will provide a full and fair review of the claim by individuals associated with us, but who were not involved in making the initial denial of the claim. A member may provide us with additional information that relates to a claim and a member may request copies of information that we have pertaining to his/her claim. We will notify the member of our decision in writing within 60 days of receiving your appeal. If a member does not receive our decision within 60 days of receiving the appeal, a member may be entitled to file a request for an external review.

When a member appeals a claim, NetCare must give you its decision within:

1. **Urgent Care Claims** – 72 Hours Reply Time
   A special kind of pre-service claim that requires a quick decision due to a health condition that may be threatened. If your appeal concerns urgent care, you may be able to have the internal appeal and external review take place at the same time.

2. **Pre-Service Claims** – 30 Days Reply Time
   Denials of non-urgent care you have not yet received.
3. Post-Service Claims – 60 Days Reply Time
Claims for benefits under NetCare, including claims after medical care have been provided, such as reimbursement or payment of the costs of the services provided.

External Review
If we have denied your request for the provision of or payment for a health care service or course of treatment, you may have a right to have our decision reviewed by independent health care professionals who have no association with us if our decision involved making a judgment as to the medical necessity, appropriateness, health care setting, level of care or effectiveness of the health care service or treatment you requested by submitting a request for external review within four (4) months after the date you receive our denial to Guam Department of Revenue and Taxation, Office of the Insurance Commissioner, 1240 Army Drive Barrigada, GU 96921, telephone 671-635-1844. For standard external review, a decision will be made within forty-five (45) days of receiving your request. If you have a medical condition that would seriously jeopardize your life or health or would jeopardize your ability to regain maximum function if treatment is delayed, you may be entitled to request an expedited external review of our denial. If our denial to provide or pay for health care service or course of treatment is based on a determination that the service or treatment is experimental or investigation, you also may be entitled to file a request for external review of our denial. For details, please review your Benefit Plan Document or contact our office at 671-472-3610, 424 W. O'Brien Drive, Jumale Center Ste 200, Hagatna, GU 96910.

Expedited External Review - An expedited process if you have a medical condition where the timeframe for completion of a standard external review, pursuant to the Uniform Health Carrier External Review Act, would seriously jeopardize your life or health or ability to regain maximum function. A decision will be made expeditiously as your medical condition or circumstances requires, but in no event more than seventy-two (72) hours after the date of receipt of your request.
EXHIBIT G

MEDICAL LOSS RATIO

Hypothetical Illustration

This Exhibit serves as a hypothetical illustration for the purposes of illustrating how the formula might work based on hypothetical numbers.

ASSUMPTIONS:

1. Fiscal Year 2016 earned premiums are 60,000,000 from October 2015 through September 2016 (level 5,000,000 per month)

2. Fiscal Year 2017 earned premiums are 72,000,000 from October 2016 through September 2017. (Level 6,000,000 per month)

3. Assume the commercial block of business earned premium is $20,000,000 for each of Fiscal Year 2016 and 2017

4. Assume the calendar 2016 MLR refund (based upon aggregate commercial and GovGuam experience) is 2% of premium

5. Assume the calendar year 2017 MLR refund (based upon aggregate commercial and GovGuam experience) is 1% of premium

6. Assume the GGFY17 loss ratio is 80% for the fiscal year October 2016 through September 2017

Then, the GGFY16 premium earned in calendar 2016 is 45,000,000 and the GGFY17 premium earned in calendar year 2016 is 18,000,000 for a total of 63,000,000

Assume there is no renewal of the GGFY18. Then GovGuam will earn a MLR refund for calendar 2016 of 2% of 63,000,000, or 1,260,000. GG will earn a MLR refund for calendar 2017 of 1% of 54,000,000, or 540,000.

The participation contract refund for GGFY17 is 3,600,000 (5% of 72,000,000) before adjustment for MLR refunds.

The calendar 2016 MLR refund applicable to GGFY17 is 18,000,000 (3 months of GGFY17 premium) divided by 63,000,000 (9 months of GGFY16 premium plus three months of GGFY17 premium). This becomes 360,000, which is 28.57143% of the 1,260,000 2016 refund to GovGuam.

The calendar, 2017 MLR refund in this illustration which is applicable to GGFY17 is 100% of the 540,000, because for the sake of this illustration we assume no renewal.

Therefore, the participation refund is reduced by 900,000 (360,000 + 540,000)

This process removes the duplication of the MLR refund and the participation refund and keeps the GGFY17 refund plus incurred claims equal to 85%.

In this situation, GG gets 100% of both the 2016 and 2017 MLR refunds and an additional refund from the Participation agreement.

The above numbers are hypothetical and for illustration purposes only.
